a
Size law across layers
correct
SET, 4 attributes
SET, 6 attributes
OR join
propagator
$y = x$
wrong
inverse temperature × margin, $\beta\Delta$
log number of competitors at the margin
b
Depth law
impossible on paths
beats the worst case
answered
trained, 100 vertices
49 vertices
answered every tested lookahead
lookahead
layers L
c
Size law on SET
boundary: smallest exact $\beta\Delta$
$\beta = \frac{2}{3}\ln 2P$
β held at 32 cards
β held at 8 cards
reads at 364 cards
reads correctly
fails at 256 cards
fails at 48 cards
fails
inverse temperature × margin, $\beta\Delta$
cards on the table (SET with 6 attributes)
d
Where four layers stop
start
last 16 roads
begins to fail
goal
